

SHAREPOINT

Course Outline

What is SharePoint?

SharePoint is Microsoft's way of saying, "Stop emailing 37 versions of the same file and put it in one place!" 😊

Think of it as a digital office where documents, teams, and workflows live together—without getting lost in someone's Downloads folder. 📁 🚀

Introduction Module

- ☛ Day 1 - Microsoft 365
- ☛ Day 2 - Microsoft SharePoint

Sites Module

- ☛ Day 3 – SharePoint Sites – Classic & Modern
- ☛ Day 4 – SharePoint Sites – Communications & Team Site
- ☛ Day 5 – SharePoint Sites – Architecture – Hubsites & Subsites
- ☛ Day 6 – SharePoint Sites – Customization
- ☛ Day 7 – SharePoint Sites – Pages & Web Parts

Lists Module

- ☛ Day 8 – SharePoint Lists – Part I
- ☛ Day 9 – SharePoint Lists – Part II
- ☛ Day 10 – SharePoint Lists – Part III

Document Library Module

- ☛ Day 11 – SharePoint Document Library – Part I
- ☛ Day 12 – SharePoint Document Library – Part II

Manage SharePoint Module

- ☛ Day 13 – SharePoint Permission Management
- ☛ Day 14 – SharePoint integration with Microsoft Teams, Outlook & OneDrive

Power Platforms Module

- Day 15 – Microsoft Power Platforms
- Day 16 – Power Apps – Part I
- Day 17 – Power Apps – Part II
- Day 18 – Power Apps – Hands On Project
- Day 19 – Power BI – Part I
- Day 20 – Power BI – Part II
- Day 21 – Power Automate – Part I
- Day 22 – Power Automate – Part II

SharePoint Developer Module

- Day 23 – Web Development – HTML & CSS
- Day 24 – Web Development – JavaScript
- Day 25 – Web Development – React
- Day 26 – SharePoint Framework – SPFx – Part I
- Day 27 – SharePoint Framework – SPFx – Part II
- Day 28 – SharePoint Online Management Shell
- Day 29 – Microsoft Graph API – SharePoint Online

Capstone Projects Module

- Day 30 – ABC Holdings – Capstone Project
- Day 31 – Green Valley University – Capstone Project
- Day 32 – Employee Directory – Capstone Project

Course Objective

This **32-Day SharePoint Administrator, Power Platform & Developer Bootcamp** is designed to equip students with the knowledge, practical experience, and industry-ready skills needed to **design, build, customize, automate, manage, and develop modern SharePoint Online solutions** within the **Microsoft 365 ecosystem**. 🌐 📁

By the end of this bootcamp, students will be able to:

Microsoft 365 & SharePoint Fundamentals

- ✓ Understand the Microsoft 365 ecosystem and its core services.
 - ✓ Explain the role of SharePoint Online in modern digital workplaces.
 - ✓ Navigate and work confidently within SharePoint Online environments.
-

SharePoint Sites & Collaboration

- ✓ Create and manage Modern Sites, Team Sites, and Communication Sites.
 - ✓ Design effective site architectures using Hub Sites and Subsites.
 - ✓ Customize SharePoint sites to meet organizational requirements.
 - ✓ Create engaging pages using modern Web Parts and site components.
 - ✓ Build collaborative workspaces for teams and departments.
-

SharePoint Lists & Data Management

- ✓ Create and manage SharePoint Lists for business processes.
 - ✓ Design custom columns, views, forms, and list templates.
 - ✓ Organize and manage structured business data efficiently.
 - ✓ Implement list-based solutions for tracking, reporting, and collaboration.
-

Document Management

- ✓ Create and manage SharePoint Document Libraries.
 - ✓ Implement document versioning, metadata, and content organization.
 - ✓ Configure document sharing and collaboration features.
 - ✓ Apply document management best practices.
-

SharePoint Administration & Governance

- ✓ Configure SharePoint permissions and security settings.
 - ✓ Manage user access and role-based permissions.
 - ✓ Implement governance and content management strategies.
 - ✓ Administer SharePoint environments effectively.
-

Microsoft 365 Integration

- ✓ Integrate SharePoint with Microsoft Teams 
 - ✓ Connect SharePoint with Outlook 
 - ✓ Synchronize files using OneDrive 
 - ✓ Improve collaboration across Microsoft 365 applications.
-

Power Platform Development

- ✓ Understand the Microsoft Power Platform ecosystem.
 - ✓ Build business applications using Power Apps 
 - ✓ Create automated workflows using Power Automate 
 - ✓ Develop interactive reports and dashboards using Power BI 
 - ✓ Connect SharePoint data with Power Platform solutions.
-

SharePoint Development

- ✓ Learn the fundamentals of HTML, CSS, and JavaScript 🌐
 - ✓ Understand React development for modern SharePoint solutions ⚙️
 - ✓ Build custom web parts using SharePoint Framework (SPFx) 🔧
 - ✓ Package, deploy, and manage SharePoint customizations.
-

Advanced SharePoint Administration

- ✓ Use SharePoint Online Management Shell for administration.
 - ✓ Automate administrative tasks using PowerShell scripts.
 - ✓ Manage SharePoint Online environments efficiently.
-

Microsoft Graph API Integration

- ✓ Understand Microsoft Graph API concepts.
 - ✓ Access SharePoint and Microsoft 365 data programmatically.
 - ✓ Build enterprise integrations using Microsoft Graph API.
 - ✓ Develop connected solutions across Microsoft 365 services.
-

Real-World Project Experience

- ✓ Apply classroom knowledge through hands-on capstone projects.
 - ✓ Design and implement enterprise SharePoint solutions.
 - ✓ Solve real-world business challenges using Microsoft technologies.
 - ✓ Build a professional portfolio showcasing completed projects.
-

Learning Outcomes

Upon successful completion of this bootcamp, students will be able to:

- ☀️ Design and implement modern SharePoint Online solutions.

- ☀️ Build collaborative digital workplaces using Microsoft 365.
- ☀️ Automate business processes with Power Platform.
- ☀️ Develop custom SharePoint applications using SPFx and React.
- ☀️ Administer SharePoint environments securely and efficiently.
- ☀️ Integrate SharePoint with Microsoft Teams, Outlook, OneDrive, Power BI, Power Apps, Power Automate, and Microsoft Graph API.
- ☀️ Deliver enterprise-grade solutions through real-world projects.
- ☀️ Prepare for careers as:
 - 👤 SharePoint Administrator
 - 💻 SharePoint Developer
 - ☁️ Microsoft 365 Administrator
 - ⚡ Power Platform Developer
 - 📊 Power BI Developer
 - 📈 Business Analyst
 - 🤝 Collaboration Solutions Specialist

🚀 Final Goal

By the end of this bootcamp, students will have the confidence and practical skills to **manage, customize, automate, and develop modern SharePoint Online solutions**, making them ready for real-world projects, internships, certifications, and professional careers in the Microsoft ecosystem. 🎯 ✨ 💡
